About this catalogue

What this catalogue is, what its numbers are, and how its descriptions are set.

This catalogue is a review instrument for the reusable visual vocabulary of Bookify. It shows fifteen chart families in sixteen figures, ten diagram presets and four illustration families. Figure 1 is the first chart, Figure 17 is the first diagram, and Photograph 1 is the first photograph.

Every chart value here is synthetic and authored for this review; none is a measurement. The diagrams are illustrative schematics, not reconstructions of a source figure. The printed caption and a build warning say so, and no figure carries an invented source anchor.

Every chart, diagram and full-width photograph description is centred line by line, including wrapped lines. A side illustration's description is centred line by line in its image column, and its credit stays separate and left-aligned in that column. Source notes remain left; table and equation captions are unchanged.

The four illustration families are a contemporary photograph, one public-domain historical image, original editorial artwork, and a conceptual reconstruction. The artwork is local vector work; the reconstruction states that no original was traced. None of the local originals claims documentary status.

Đây là bản duyệt cho hệ thống hình ảnh của Bookify: mười lăm họ biểu đồ, mười bố cục sơ đồ và bốn họ minh hoạ. Mọi giá trị biểu đồ là dữ liệu tổng hợp, không phải số đo; sơ đồ chỉ có tính minh hoạ. Mô tả được căn giữa từng dòng, còn ghi nguồn và tín dụng vẫn căn trái.

このカタログは、再利用できる図表の語彙を一度に確認するための資料です。 図の説明は行ごとに中央揃えにし、出典とクレジットは左揃えのまま分けて示します。 写真、歴史画像、編集用の原画、概念的な再構成は、それぞれ種類を明記します。

Charts: bars

Three bar layouts: one series, grouped series and stacked segments.

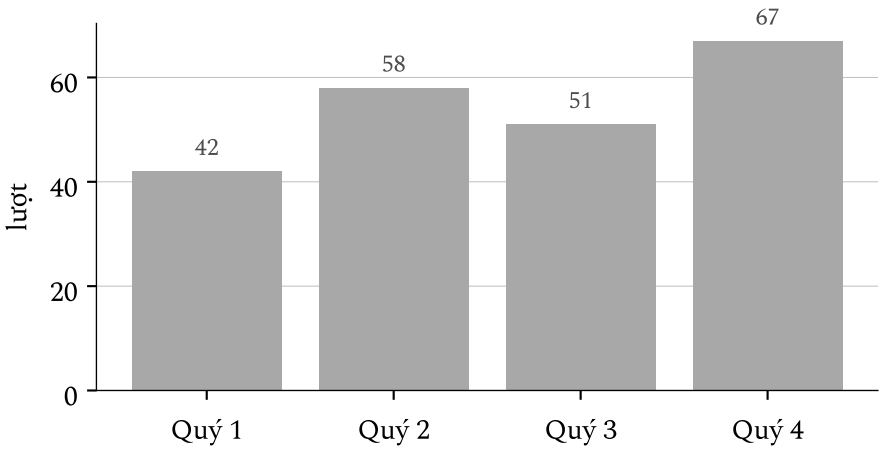

Figure 1. Weekly sessions by quarter. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

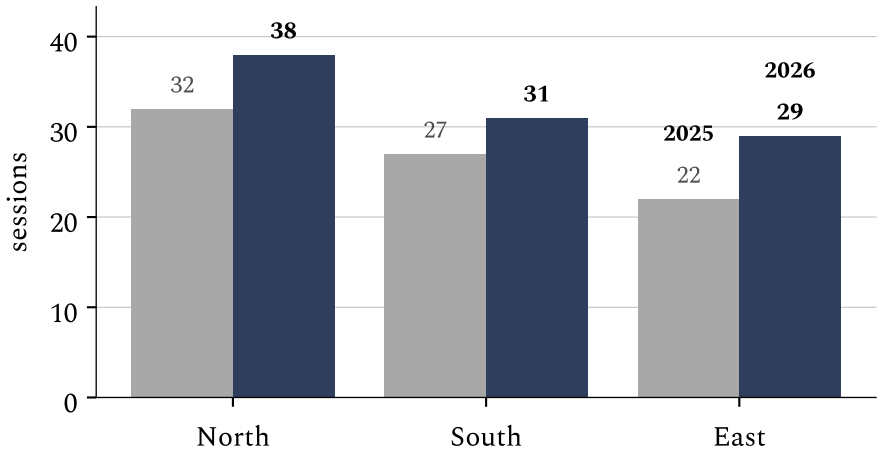

Figure 2. Two years of quarterly sessions by region, shown side by side so the direction of change is readable without a legend. Hai năm hoạt động theo khu vực, đặt cạnh nhau để thấy chiều thay đổi. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

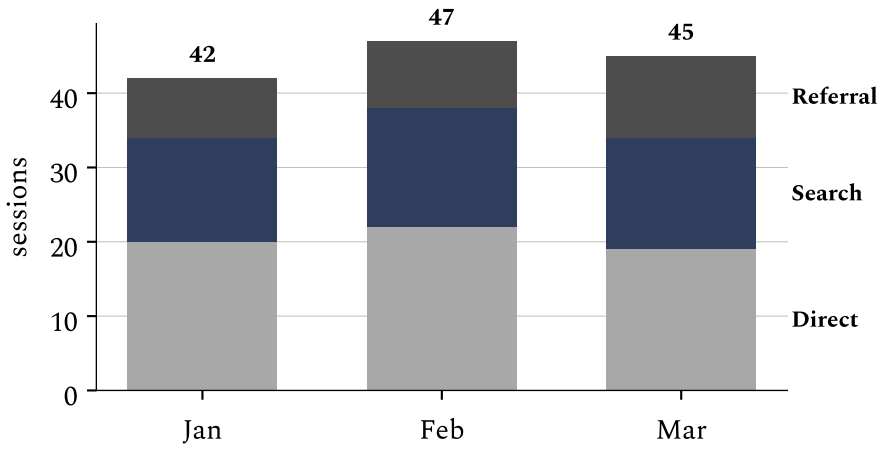

Figure 3. Monthly sessions split into direct, search and referral traffic; each stack total stays labelled. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

Charts: lines

Two continuous forms: a line with a gap and a stacked area.

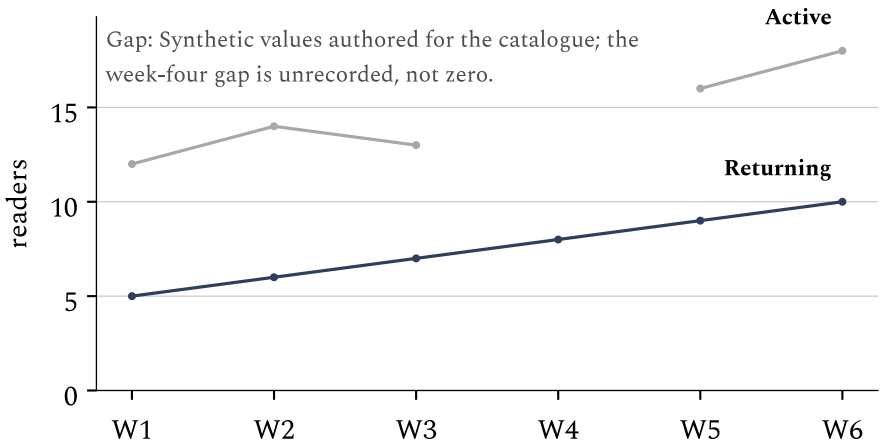

Figure 4. Active and returning readers across six weeks. The gap is an unrecorded week, not a zero. Synthetic data. Synthetic values authored for the catalogue; the week-four gap is unrecorded, not zero.

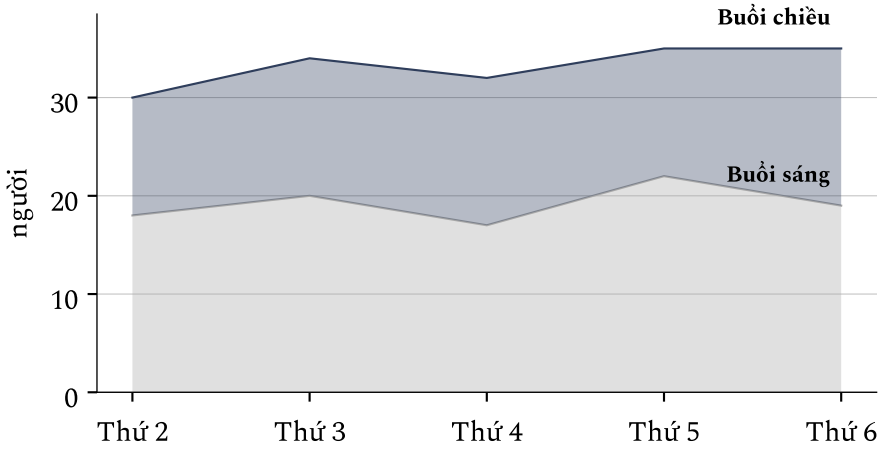

Figure 5. Morning and afternoon attendance on five teaching days, stacked to show the daily total. Synthetic data. Synthetic values authored for the catalogue; not measurements.

Charts: points

Two point forms: scatter and bubble.

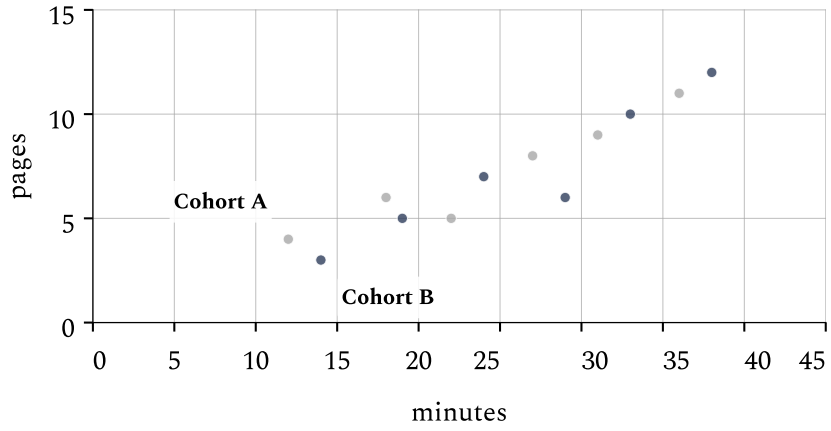

Figure 6. Session length against pages read for two reader groups, with one mark per reader. Synthetic data. Synthetic values authored for the catalogue; not measurements.

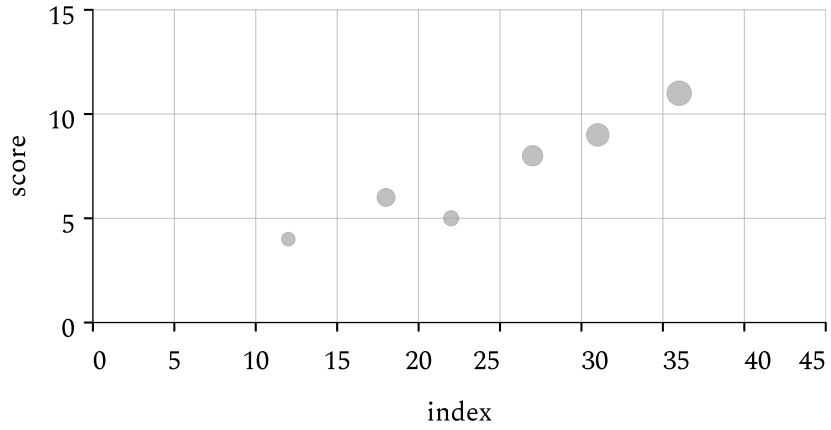

Figure 7. Reach against engagement for six channels; bubble area encodes the stored audience size. Synthetic data. Synthetic values authored for the catalogue; not measurements.

Charts: distributions

Four distribution forms, each with stored summaries or samples.

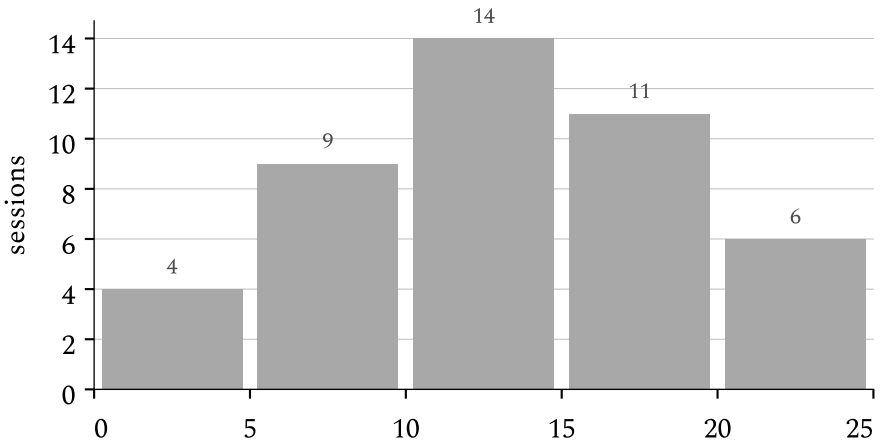

Figure 8. Distribution of session lengths in five-minute bins. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

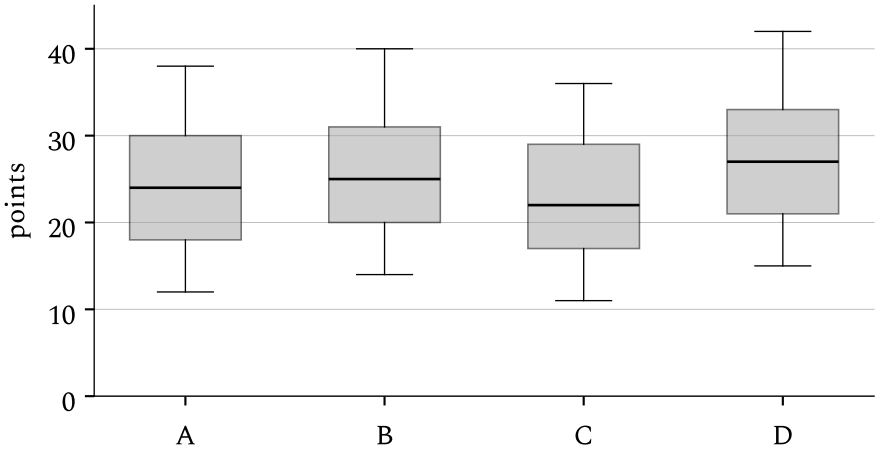

Figure 9. Five-number summaries for four class groups; whiskers are the stored minimum and maximum. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

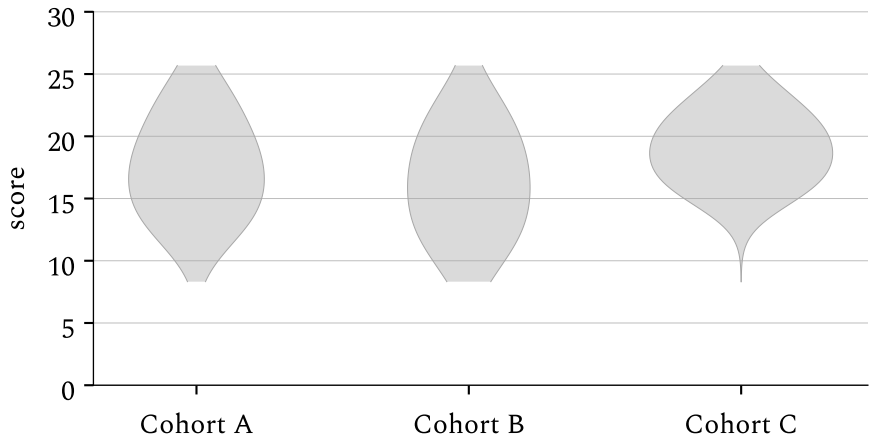

Figure 10. Session-length density for three cohorts, using a fixed Gaussian kernel and stored samples. Synthetic data.

Synthetic samples authored for the catalogue; density uses a fixed Gaussian kernel and Silverman bandwidth.

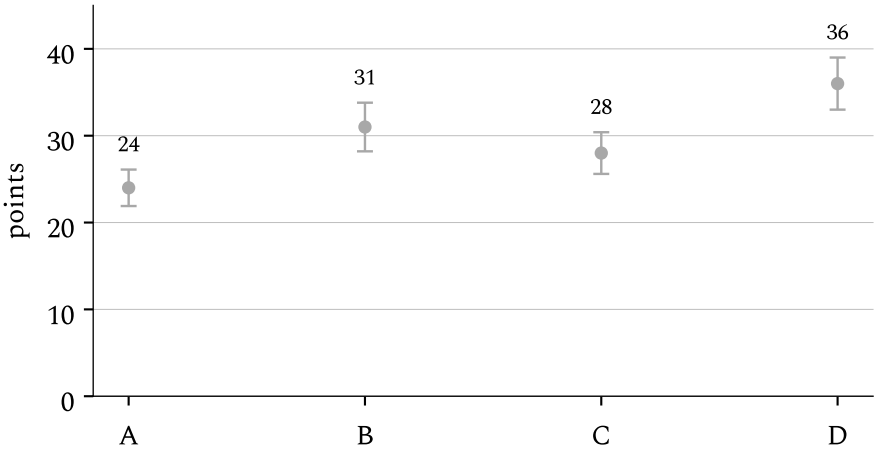

Figure 11. Mean score by cohort with stored uncertainty bars. Synthetic data. Synthetic values authored for the catalogue; not measurements.

Charts: matrices

Two matrix-like forms: a vector heat map and a shared-scale radar.

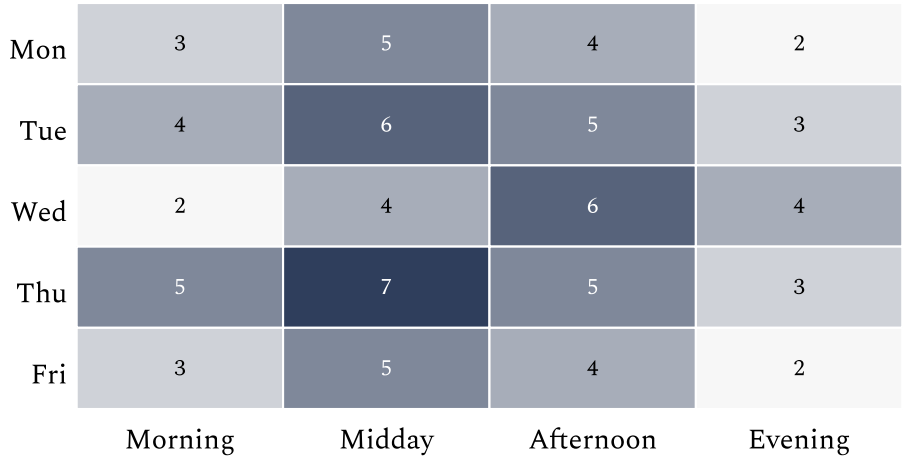

Figure 12. Weekly activity by channel; every cell prints its stored value. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

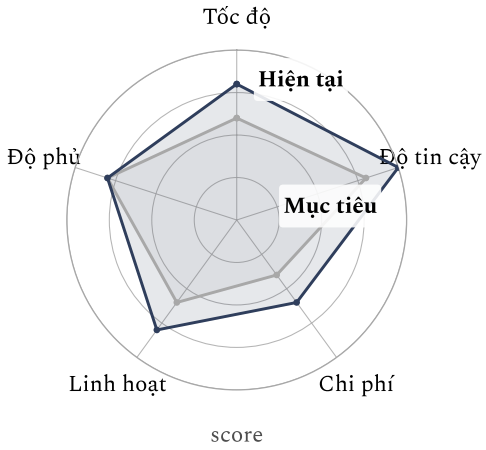

Figure 13. Five service dimensions for the current and target state on one shared scale. Năm chiều dịch vụ trên một thang chung cho hiện tại và mục tiêu. Synthetic data.

Synthetic values authored for the catalogue; not measurements.

Charts: parts

Three part-to-whole forms: pie, donut and waterfall.

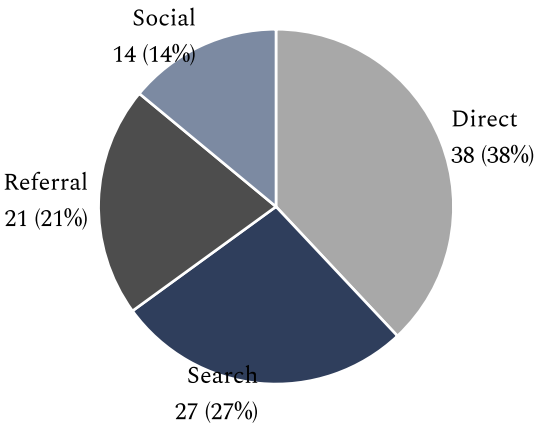

Figure 14. Share of sessions by channel; every slice prints its value and derived share. Synthetic data. Synthetic values authored for the catalogue; not measurements.

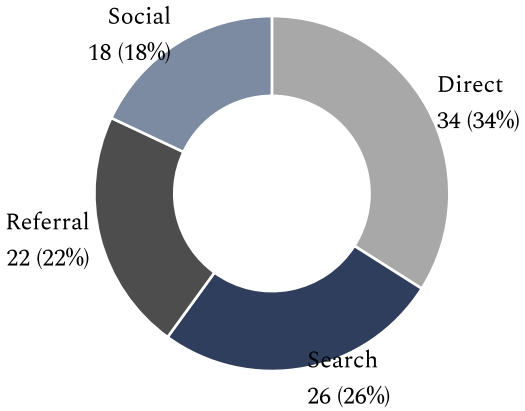

Figure 15. The same channel share with a centre hole; the values are stored, not recomputed at render. Synthetic data. Synthetic values authored for the catalogue; not measurements.

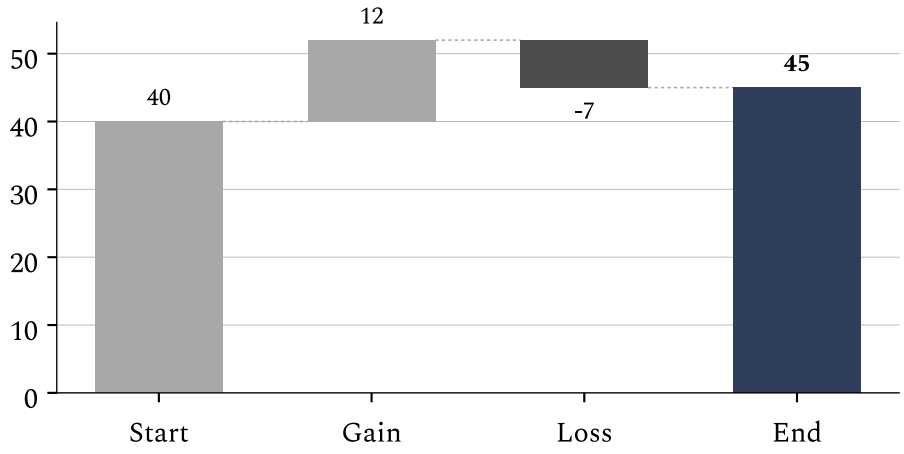

Figure 16. A running total from start to end, with gains and losses shown as deltas. Synthetic data. Synthetic values authored for the catalogue; not measurements.

Diagrams: flow

Three flow layouts: process, cycle and timeline.

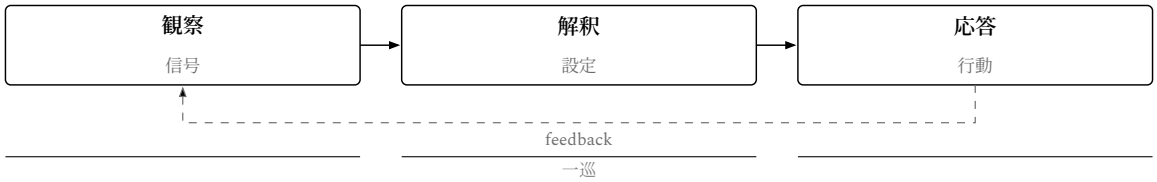

Figure 17. 観察、解釈、応答の一巡。 *Illustrative diagram.*

Illustrative schematic; no source evidence.

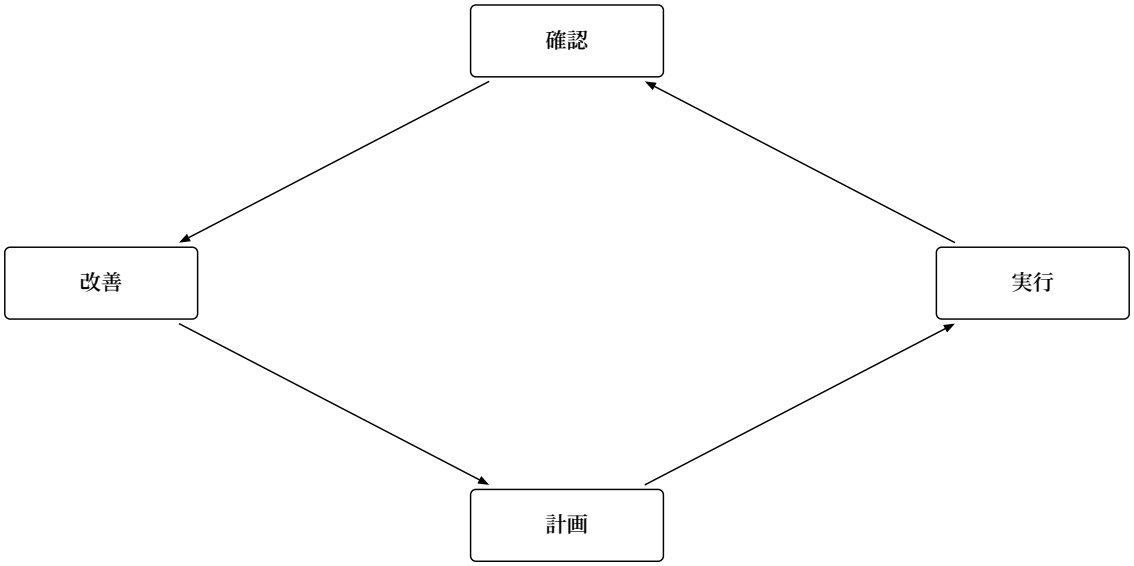

Figure 18. 計画から改善へ戻る四段階の循環。 *Illustrative diagram.*

Illustrative schematic; no source evidence.

Figure 19. 四つの出来事を時間順に置く。 *Four events in time order, with labels alternating above and below. Illustrative diagram.*

Illustrative schematic; no source evidence.

Diagrams: structure

Three structure layouts: hierarchy, decision tree and layered model.

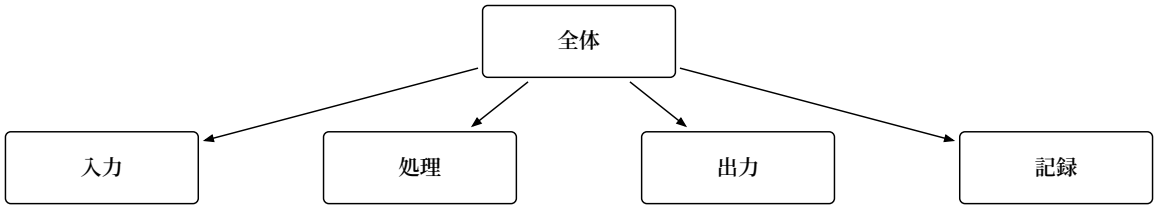

Figure 20. 全体から入力・処理・出力へ下る階層。 *A hierarchy from the whole to input, process and output, with one parent per node. Illustrative diagram.*

Illustrative schematic; no source evidence.

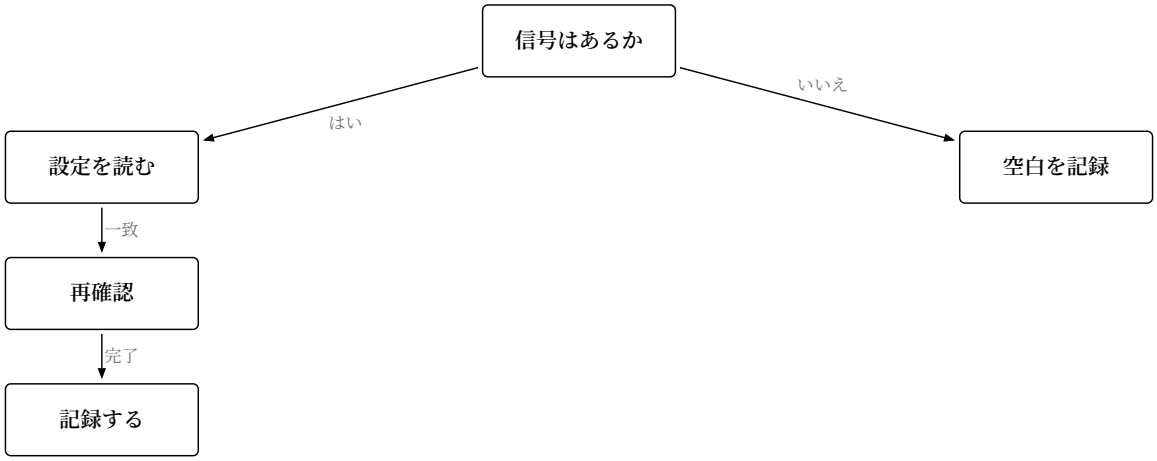

Figure 21. 信号の有無で分岐する決定木。 *A decision tree branches on the signal, and every edge carries its condition. Illustrative diagram.*

Illustrative schematic; no source evidence.

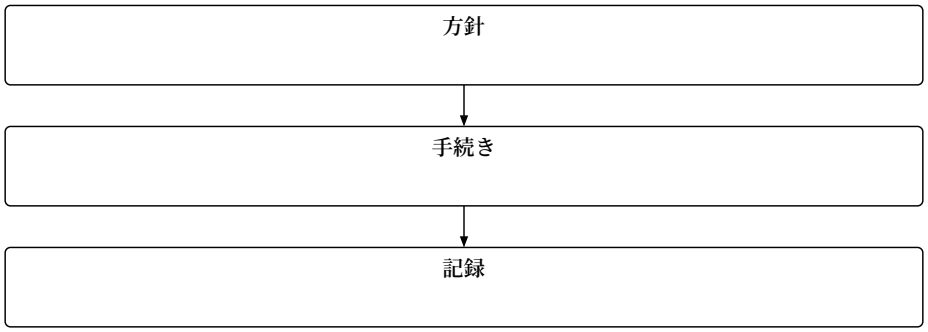

Figure 22. 三段の層モデル。 *A three-layer model ordered policy, procedure and record. Illustrative diagram.*

Illustrative schematic; no source evidence.

Diagrams: relations

Four relation layouts: network, matrix, Venn and swimlane.

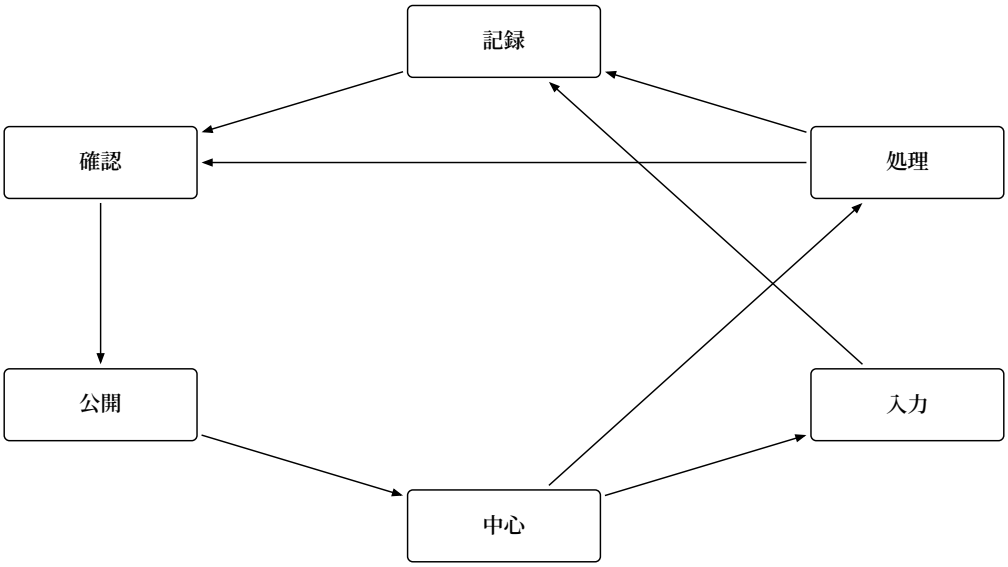

Figure 23. 六つの節点を円周に置く関係図。 *A relation diagram places six nodes on a circle, with no self edges. Illustrative diagram. Illustrative schematic; no source evidence.*

入力	速さ	正確さ	記録
処理	中程度	高い	手動
出力	遅い	中程度	自動

Figure 24. 三行三列の対応表。 *Illustrative diagram. Illustrative schematic; no source evidence.*

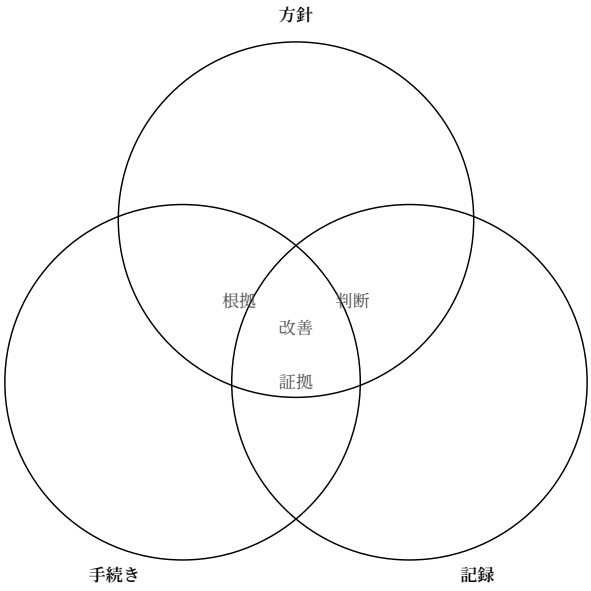

Figure 25. 三集合の重なり。 *A three-set overlap with four region labels; area carries no quantity. Illustrative diagram. Illustrative schematic; no source evidence.*

	草稿	確認	修正	配布
著者	草稿		修正	
校閲		点検		
公開				配布

Figure 26. 三つの役割と四つの段階からなるスイムレーン。 *A swimlane with three roles and four stages, at most one node per cell. Illustrative diagram.*

Illustrative schematic; no source evidence.

Illustrations

Four curation families, each with its own rights record.

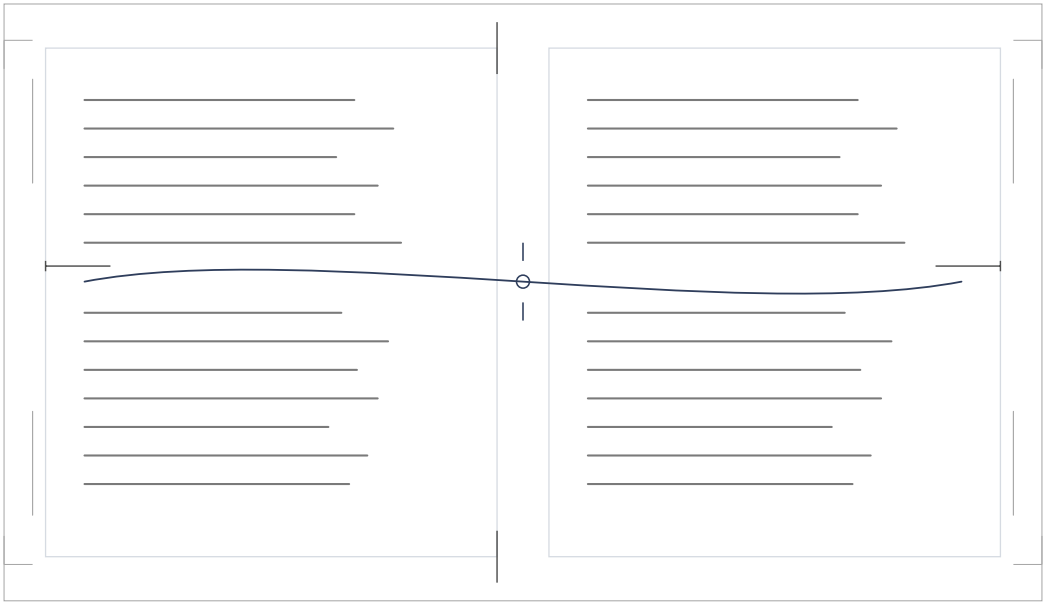

Photograph 1. A welcome ceremony in Tokyo, 2014.
Photo: William Ng / US Department of State (public domain)

Contemporary photograph: this documentary image is placed beside a short note so the picture and its rights statement stay together. The record identifies the creator and the public-domain licence; the caption and credit remain separate.

Historical image: this public-domain photograph records a 1945 meeting in Tokyo. The caption gives the people, place and date; this note records the rights basis without adding a new claim about the event.

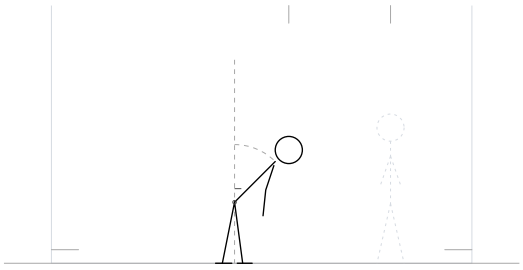

Photograph 2. General Douglas MacArthur and Emperor Hirohito at their first meeting, Tokyo, 27 September 1945. Tướng MacArthur và Thiên hoàng Hirohito trong lần gặp đầu tiên, Tokyo, ngày 27 tháng 9 năm 1945.
Photograph: Gaetano Faillace / US Army (public domain)

Photograph 3. Original artwork: an abstract editorial composition of two facing page fields joined by a single reading line. It is a design study made for this catalogue, not a record of any specific book, object or event.

Artwork: original vector drawing made for this catalogue; no external source.

Photograph 4. Conceptual reconstruction of a standing bow, assembled from a written description to show the inferred posture and its upright reference; no original drawing, photograph or object was traced, and the angles are illustrative rather than measured.

Artwork: original vector drawing made for this catalogue; conceptual reconstruction, no external source.

Conceptual reconstruction: the drawing is inferred from a written description, not traced from an original. The caption states that limitation; this note keeps the class wording and the reading order beside the image.

Coverage

The finite inventory behind every figure in this document.

The table lists every named family once. Pie and donut share one row and reference two figures; every other row references one figure.

Family	Kind or preset	Figure
Bar	bar	Figure 1
Grouped bar	grouped_bar	Figure 2
Stacked bar	stacked_bar	Figure 3

Table 1. Coverage of the fifteen chart families, ten diagram presets and four illustration families.

No family outside this table is part of the catalogue. A missing or extra kind, preset or illustration family fails the catalogue gate rather than appearing silently.
